Product Details

LED CHIP

Selected imported high end LED chip, the quality and light efficiency is higher. The life span is longer.

Accurate Zoomable

By pushing or pulling the front part of the light, different size of the beam cone and brightness can be realized. The beam angle is from 25 to 65 degrees adjustable. No light is wasted, another way of energy saving. It is a Multi-function in one light.

Optical LENS design

Profession optical LENS is designed to match the accurate focus control function. Make the light more perfect.

E27 lamp base

E27 lamp fitting, easy installation, more fun in DIY the lighting.

Focusable

1

The background wall illumination example

With the patented focus control technology, just pushing or pulling the front part of the light enables you to get a different size of the beam cone and brightness, offers the most suitable light for your home, makes your home more cozy and comfortable and in the end builds a healthy and comfortable lighting space for your family.

Bar lighting experience

Make the light position and the brightness in the table of the corridor precisely.
